

PRESS RELEASE

ECOSLOPS SIGNS THE UNITED NATIONS SUSTAINABLE OCEAN PRINCIPLES

Paris, September 7th, 2020

Ecoslops, the cleantech that brings oil into circular economy, announces the signature of the [United Nation Sustainable Ocean Principles](#).

Launched in September 2019, the Sustainable Ocean Principles were developed in consultation with stakeholders from the private sector, NGOs, academic institutions and UN agencies. They are intended to build upon and supplement the overarching [Ten principles of the UN Global Compact](#) on human rights, labor, environment and anti-corruption.

Vincent FAVIER, CEO declared: "We are pleased to be joining business leaders from around the world in setting clear and shared principles through the Sustainable Ocean Principles. As a circular economy company, we are proud to contribute to oceans free of hydrocarbon residues by recycling them into new fuels, and to support and promote these Sustainable Ocean principles throughout our value chain."

As a UN Global Compact signatory, Ecoslops is particularly involved in the Sustainable Ocean Principle n°3: "Take action to prevent pollution affecting the ocean, reduce gas emissions in their operations to prevent the ocean warming and acidification, and work towards a circular economy."

ABOUT ECOSLOPS

Ecoslops is listed on Euronext Growth in Paris - Code ISIN : FR0011490648

Ticker : ALESA / PEA-PME & FCPI eligible

Investor Relations : ir-ecoslops@ecoslops.com - 01 83 64 47 43

Player of the circular economy, Ecoslops has developed and implemented a unique technology to upgrade oil residues into new fuels and light bitumen. The solution proposed by Ecoslops is based on a unique micro-refining industrial process that transforms these residues into commercial products that meet international standards. Ecoslops offers an economic and ecological solution to port infrastructure, waste collectors and ship-owners through its processing plants.
